Our Vision

Renewing and developing itself in parallel to its customers' needs, our firm takes customer satisfaction as principle, and implements a service policy that does not compromise in reliability. Besides increasing business efficiency and expanding its market share, from the beginning, our firm aims at applying its quality criteria to every stage of the works it undertakes, and to prove to its customers that the final products are the end results of joint efforts of all staff employed in the firm.

Our Mission

With its 23 years of experience in mechanical installations and natural gas industrial systems, following the technological developments worldwide, our firm has collaborated with other elite institutions in this field and formed business and solution partnerships with them.

Notre Vision

Renouveler et développer parallèle à lui-même dans les besoins de ses clients, notre firme prend la satisfaction du client en tant que principe, et met en œuvre une politique qui ne compromet pas la fiabilité du service. En plus d'accroître l'efficacité de l'entreprise et augmenter sa part des marchés, depuis le début, notre firme cible ses critères de qualité s'appliquant à toutes les étapes des travaux qu'il entreprend, et de prouver à ses clients que les produits finis sont les résultats finaux des efforts conjoints de l'ensemble du personnel employé dans l'entreprise.

Notre Mission

Avec ses 23 années d'expérience dans les installations industrielles et les systèmes mécaniques de gaz naturel, à la poursuite des développements technologiques dans le monde, notre firme a collaboré avec d'autres institutions d'élite dans ce domaine et a formé des partenariats des affaires et des solutions.

Perfectly combined heat and power generation.

The 21st century is an important component of energy supplies. As a major partner of the energy suppliers in Turkey, CAKA GROUP provides the necessary CHP technologies.

Complex tasks at sensitive locations are solved by CAKA GROUP engineers and technicians, using innovative thermal concepts in the field of heat and steam generation, and in the mean time achieving lowest possible noise emission values. With a reliable high grade CHP technology, economic utilization and maintenance guarantee can be successfully provided as a whole.

Natural gas industrial contracts

- Organized industrial zone infrastructure works
- Piping gas, CNG and LNG systems

Génération de chaleur et d'énergie, parfaitement combiné

Le 21e siècle est une composante importante de l'approvisionnement énergétique. En tant que partenaire majeur des fournisseurs d'énergie en Turquie, CAKA GROUP fournit les technologies de cogénération, nécessaires.

Les tâches complexes à des endroits sensibles sont résolus par les ingénieurs et techniciens de GROUPE CAKA, en utilisant des concepts innovants dans le domaine thermique de la chaleur et la génération de vapeur, et dans le même temps la réalisation de plus petites valeurs possibles d'émission de bruit. Avec une centrale de cogénération de qualité fiables et de haute technologie, l'utilisation économique et le maintien de garantie peut fourni avec succès en ensemble.

Contrats de gaz naturel industriels

- Zone industrielle organisé, les travaux d'infrastructure
- Tuyauteries de gaz, systèmes du GNC et le GNL

100% service availability.

Our goal is that you can offer maximum efficiency and availability at your site. Our highly qualified and motivated service teams are always ready for maintenance and repairs. Through our regular training, our teams are well informed of latest technologies on engines and control.

La 100% de disponibilité du service.

Notre objectif est que vous pouvez offrir un maximum d'efficacité et de la disponibilité sur votre système. Nos équipes de service hautement qualifiés et motivés sont toujours prêts pour les maintenances et les réparations. Grâce à notre formation régulière, nos équipes sont bien informées des dernières technologies sur les moteurs et les contrôles

We have been operating in combined heat systems (co-generation, tri-generation), heating, cooling, air conditioning, air and water pressurizing, water treatment, potable water storage and large scale natural gas systems installations, and the most important of all, renewable energy fields, since we were established in 1989.

Our goal is to raise the quality of the environments the people live in through comfort targeted activities of the mechanical installation department, and to increase the quality of production and to achieve efficiency through its activities in industry.

Puisque nous avons été créé en 1989, nous avons été dans les systèmes d'exploitation combinés de chaleur (cogénération, trigénération), chauffage, refroidissement, climatisation, air et eau sous pression, traitement des eaux, stockage de l'eau potable et à grande installations des systèmes de gaz naturels, et le plus important de tous, les champs d'énergie renouvelables,

Notre objectif est d'améliorer la qualité des environnements les gens vivent à travers des activités ciblées de confort le service d'installation mécanique, et d'augmenter la qualité de la production et d'atteindre une efficacité à travers ses activités dans l'industrie.
